DETAILED ACTION

Response to Arguments

Applicant's arguments, see page 9 and 10, filed 4 September 2007, with respect to claims 1,3-5,8-9,11,13-15,21 and 22 have been fully considered and are persuasive. The rejection of claims 1,3-5,8-9,11 and 13-15 has been withdrawn.

Applicant's arguments filed 4 September 2007, with respect to claims 16-20 have been fully considered but they are not persuasive. Applicant argues that Hardin does not disclose a bracket including a tap on the top edge of one side of the plates adapted for installing an indicator light thereon. However, Hardin clearly shows an upper tab portion (135) including a LED aperture (140) for supporting an indicator light, i.e. LED. Further, the limitation of "bent" is being treated as a product by process limitation.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 16,17,19 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Hardin (6,556,437). Hardin discloses a mounting device assembly including a chassis including a plurality of electronic components (Hardin column 2, lines 17-23) and a mounting device for mounting fans (410) to the chassis. The mounting device

Art Unit: 3745

includes a tray (605) mounted to the chassis and a plurality of brackets, composed of bracket halves (405). The bracket comprises a closed end (305) and an opposed open end, in a U-shaped cross-section and dimensioned in compliance with the fan (410) (Hardin column 5, lines 19-27). The tray includes a plurality of pairs of mounted sections (610) each fixedly engaging with a corresponding bracket. Both the tray and the brackets are discrete from one another and are of a U-shaped cross-section. The brackets (405) include a supporting tab (135) extending from the top edge of one of the side plates and adapted for installing an indicator light (510) by means of LED support aperture (140).

In regard to claim 16, the limitation "a supporting tab bent from the top edge" is been treated as a product by process limitation; that is, that the tab is formed through bending. As set forth in MPEP 2113, product by process claims are NOT limited to the manipulations of the recited steps, only to the structure implied by the steps. Once a product appearing to be substantially the same or similar is found, a 35 U.S.C. 102/103 rejection may be made and the burden is shifted to applicant to show an unobvious difference. See MPEP 2113.

Allowable Subject Matter

Claims 1,3-5,8,9,11,13-15,21 and 22 are allowed.

Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
